WELL CONSTRUCTION CONFERENCE

MAY 3-4, 2017

LANCASTER OHIO

The purpose of the Ohio Water Well Association's Well Construction Conference is to bring together different sectors of the water industry to gain an understanding of the many factors that go into the coordination of both an EPA regulated water system and an ODH private regulated system. The conference will feature demonstrations on proper installation of a water well that include meeting regulatory requirements.

The best part is that included with all of this hard work and education, you can enjoy an afternoon of complimentary golf, door prizes, table top displays, silent auction, and a great networking opportunity.
